

Price trend: Flat and low (0–50) from 2011 to early 2013, then breaks out sharply to a peak near 380 by 2014, pulls back and consolidates through 2015–2016, then rallies again in 2017 to a new high near 500 in 2018, settling back into the 400s after.

Volume: Low in 2010–2012, spikes to about 2bn in 2014 alongside the first price breakout, drops back in 2015–2016 during consolidation, then rises again in 2017–2018 with the second rally. Volume and price breakouts move together.

Scatter (Open vs Close): Points sit on a near-perfect diagonal line, meaning daily open and close prices are almost identical. Confirms data consistency more than it reveals a new pattern.
